

# FIFE ENGINEERING COMPANY LIMITED

## PRECISION ENGINEERING

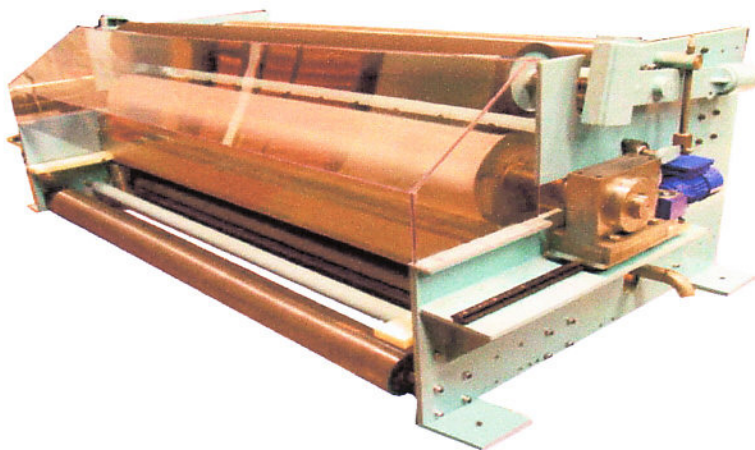

Fife Engineering has a fully equipped precision engineering department, including: -  
C.N.C.

N.C. and conventional milling, turning, grinding and cylindrical grinding.

Utilising one or a combination of these processes we at Fife Engineering are confident in our ability to produce a component of the highest quality, we are an ISO 9001:2000 accredited company and employ a 100% inspection policy on all manufactured components.

Above a precision ground component used in the manufacture of valves for the M.O.D.

Pictured right is one of our modern C.N.C. Milling machines.

Pictured left is a 3-metre wide foam line coating machine manufactured complete and assembled in house.

THE PRECISION DECISION
