

FIFE ENGINEERING COMPANY LIMITED

SPECIALIST ENGINEERING

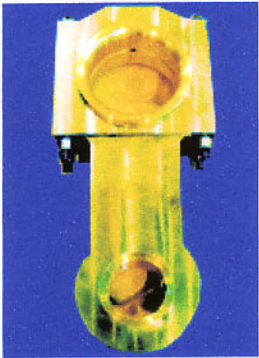

Established in 1958 Fife Engineering is staffed by a quality- minded team who enjoy what they do. This is reflected by our customer base and repetition of orders. Precision machined components turned milled and ground to customer drawings or samples our quality system is accredited to ISO 9001:2000.

SPECIALIST ENGINEERING

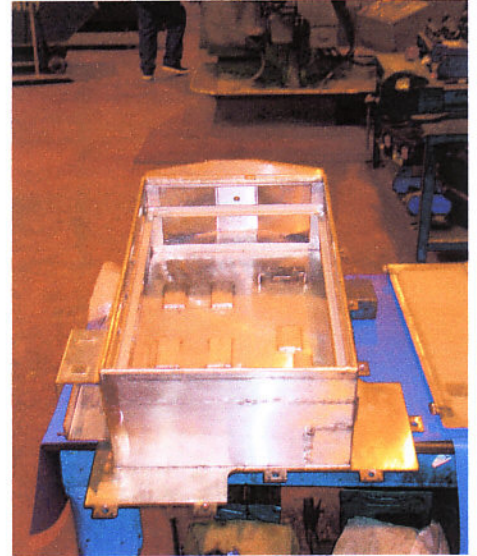

CNC milling, turning & grinding, coupled with conventional machining allows us to produce parts and tools to suit our customers needs. We supply a fast response to urgent breakdowns to reduce expensive downtime.

1 off items or batch work to suit customer requirements.

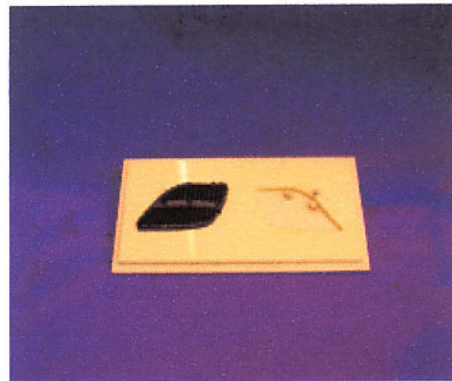

Mild steel cranks with phosphor bronze bushes produced from samples

Precision machined fabrications
